Abstract (en)
[origin: WO03035991A2] A suspending panel system for defining a workspace is disclosed. The suspended panel system includes a plurality of panel sections which are adjustable and thus allow a user to adapt the panel system to a particular workspace. The system may include a control mechanism for moving one or more panel sections into different configurations. The system may also include one or more utilities such as communications and acoustical features, visual enhancements, display features and/or lighting features.
