Abstract (en)
[origin: WO03052037A1] The invention relates to novel, highly concentrated, free-flowing pearly lustre concentrates containing (a) between 20 and 45 wt. % of pearly lustre waxes, (b) between 0.1 and 6 wt. % of anionic surfactants, and (c) between 0.1 and 8 wt. % of non-ionic emulsifiers from the group of polyol esters, with the proviso that said quantities are completed with water and optionally other auxiliary and addition agents up to 100 wt. %, that the proportion of pearly lustre waxes (a) to non-ionic emulsifiers from the group of polyol esters (c) is between 12: 1 and 7: 1, and that the proportion of polyol esters to anionic surfactants is between 2: 1 and 0.8: 1.
