Abstract (en)
[origin: WO03050219A1] The invention relates to a cleaning agent composition comprising at least one surface-active agent, at least one builder and at least one polymer containing nitrogen. The nitrogen-containing polymer is, for example, an alkoxyated polyvinylamine, an alkoxyated, acylated or alkylated polyaminoamide or a polyurethane urea with tertiary amino groups. The nitrogen-containing polymers facilitate the solution of dirt.
