Abstract (en)

[origin: WO03063106A1] Method for setting at least one rock drilling equipment (30, 40, 50) function parameter, which rock drilling equipment (30, 40, 50) comprises functions arranged to be operated by manoeuvring means, where the effect of the manoeuvring means for one function is dependent on said function parameter. When setting said function parameter, at least one value for the function parameter is transmitted to the rock drilling equipment (30, 40, 50) from a portable unit (34, 35, 36) via a wireless interface. The invention further relates to a system.
