Abstract (en)
A load spreader for use for example on air cargo transport comprises a plank member (10) of rigid polyurethane material. The plank 10 has tubular reinforcing members 11 through which are passed locating cables 15. A locking device 16, 17 is provided to clamp the plank 10 to the cables including a compressible inner member 17 which can clamp on the cable in one rotational position within an outer member 16 which compresses the inner member 17 in one rotational position thereof, and allows release thereof in an alternative position. <IMAGE>
