Abstract (en)

[origin: WO03042337A2] The invention relates to middle distillates having a maximal sulphur content of 0.05 wt. %, which contain fatty acid esters of alkoxyated polyols with at least 3 OH groups (A) and at least one cold-fluidity improving additive (B), whereby said cold-fluidity improving additive contains at least one copolymer of ethylene and one or several ethylenically unsaturated carboxylic acid esters, said copolymer having an ethylene portion of 60 to 90 mole %.
