Abstract (en)
[origin: WO03052203A2] The invention concerns a coating composition for coated paper designed to be offset printed, characterized in that the coating pigments are polyurethane microbeads having a size less than 10 micrometers, and advantageously, close to 7 micrometers. The invention also concerns a paper having a silky feel, comprising at least one side coated with said coating composition, and advantageously, both sides. Said paper is characterized in that it can be offset printed with little, even without, set-off or powdering.
