Abstract (en)

[origin: WO03056850A2] A method for administering presence information in a telecommunication and/or data network, especially for performing a service based on presence information. Administration data for an administration process is inputted vocally or inputted by means of voice recognition or a PIN is keyed in or inputted in a predefined short message format or at an IP-based interface, outside an SIP method, and is subsequently converted into an SIP-compliant format in order to carry out said administration process.
