Abstract (en)

A protective helmet (10) with a system allowing for attachment of interchangeable accessories (10, 16) includes interfaces (20) secured to the helmet and capable of receiving various pairs of brackets (14, 14', 18), each pair of brackets being used to secure a different accessory to the protective helmet. Although the interfaces (20) are located at predetermined locations, the brackets (14, 14', 18) are of varying lengths to ensure a proper pivot axis for the chosen accessory. <IMAGE>
