Abstract (en)
Dusting device for static swab. The dusting device has movable or fixed seat body for meeting requirement of new building or old building. The seat body is formed with at least one insertion connector for the sucking hose of a vacuum sucker to insert therein. The seat body is further formed with at least one dust sucking slot facing upward. The seat body is further formed with internal passages respectively communicating the insertion connector with the dust sucking slots. The vacuum sucker is connected with the dusting device and static swab is reciprocally moved on the dust sucking slot of the seat body so as to easily and quickly clean up the dust and fluff attaching to the static swab. <IMAGE>
