Abstract (en)  
The guide has a socket (4) in which a guiding system (5), a parachute system (6), and a triggering system of an elevator car are inserted. The triggering system assembled on the system (5) controls the system (6). The socket has two parts (40a, 40b) separated by a groove (41) crossing vertically through out the socket. Each part has a half-opened side (410a, 410b) to allow the systems (5, 6) to access a guide (3). An independent claim is also included for an elevator.

Abstract (fr)  
La présente invention concerne un parachute-guide (2) pour cabine d'ascenseur (1), ladite cabine circulant le long d'au moins un guide (3) à l'aide d'un système de guidage et comportant un système de parachute commandé par un système de déclenchement. Le parachute-guide (2) selon l'invention se caractérise en ce que ledit système de guidage, ledit système de parachute et ledit système de déclenchement sont associés dans un socle unique (4), ledit système de déclenchement étant monté sur ledit système de guidage. <IMAGE>
