Abstract (en)
[origin: EP1460185A2] The invention relates to an escutcheon (1) or a cover plate for covering openings or holes for piping (3) in vertical or horizontal parts of buildings. The cover plate comprises a number of retaining or clamping devices (5, 6) for interlocking the parts (1, 1') of the cover plates. On horizontal surfaces the escutcheon (1) may be assembled around a pipe (3) without any tools or adhesive. The interlocking the parts of the cover plates consist of a ball on a stick, which gives effective interlocking and non-complicated cut-out.
