Abstract (en)

[origin: EP1460188A1] An actuating device (21) is connected to a servomotor (18) for raising the closure body (7) of an outlet valve (5), and causing flushing. The closure body is directly, frictionally connected to the actuator member (13) of the servo motor. The servomotor is preferably mounted on the housing (6) of the outlet valve, forming a unit. An independent claim is included for an outlet valve for a flushing device.
