Abstract (en)  
Cover (1) for scaffolding (2) arranged in an overhanging position on a building (3) which is undergoing construction work and presenting an upper peripheral edge (4), the cover (1) being provided with a support frame (9) which can be coupled to a top (8) of the tubular scaffolding (2) itself, and an inclined covering shelf (10), which is connected in such a way that it may be selectively disengaged from the frame (9), and which extends starting from at least the upper peripheral edge (4) into space and at least beyond the tubular scaffolding (2). <IMAGE>
