Abstract (en)

[origin: EP1460599A2] The traffic reports are encoded that include at least one 'event' location, and digitally encoded reports are decoded, at least containing a location code. Within a traffic network (100), location codes are only assigned to places representing intersections or junctions (111) to which at least three through-road sections (1,2) are adjoined. An independent claim is included for a method of transmitting digitally encoded traffic reports.
