Abstract (en)
[origin: WO03045707A1] The invention concerns a paint stirring machine of the type driven by stirrer lids, on each of which is mounted a paint can, the stirrer lids being suspended by supports with lateral slide-rails on shelves (3) of the machine and individually driven by means of a front meshing pinion engaged on a rotating endless screw of the shelf, the machine comprising two vertical posts (1) supporting the shelves, one of the posts including, enclosed in a housing, the assembly of pulleys and belts driving the endless screws of the shelves. The invention is characterized in that the endless screw bearings (19) and the assembly of pulleys and belts driving the endless screws are pre-assembled adjusted on the corresponding post (1).
