Abstract (en)

[origin: WO03055944A1] The invention relates to the use of polymers on the basis of acrylamide propyl methylene sulfonic acid (AMPS) and macromonomers as crystallization inhibitors for plant-protective formulations. The polymers prevent the pesticides (herbicides, insecticides, fungicides, acaricides, bactericides, molluscides, nematicides, and rodenticides) contained in the plant-protective formulations from crystallizing. Said polymers are particularly useful in emulsifiable concentrates (EC) and suspension concentrates (SC).
