Abstract (en)

[origin: WO03056153A1] The invention relates to a method for controlling electrically-operated components of a cooling system for an internal combustion engine on a motor vehicle. The invention further relates to a computer programme for an internal combustion engine on a motor vehicle, a controller for controlling electrically-operated components of a cooling system for an internal combustion engine on a motor vehicle, a cooling system for an internal combustion engine, comprising controlled electrically-operated components and an internal combustion engine for a motor vehicle.
