Abstract (en)
[origin: WO03056244A1] High-level built-in cooking devices comprising a housing (1) are known in which a cooking chamber (5) is provided which comprises a floor chamber opening (7), which may be closed by means of a lowerable trapdoor (9), connected to the housing (1) with a trapdoor guide (15), by means of which the trapdoor (9) may be lowered along a lifting path. Said trapdoor guide (15) comprises at least one first guide element (17) on the housing side and a second guide element (23) on the trapdoor side. According to the invention, the trapdoor may be lowered over as long a lifting path as possible, whereby the trapdoor guide additionally comprises at least one intermediate element (21), which connects the first guide element (17) to the second guide element (23) and extends the lifting path of the trapdoor (9).
