Abstract (en)
[origin: WO03056246A1] Tall built-in cooking devices comprising a muffle (5) are already known per se, said devices comprising a bottom-sided muffle opening (7) which can be closed by means of a lowerable bottom door (9), provided with a drive device (49) in order to produce a lifting movement of the bottom door (9). In order to determine the weight of a cooking item, the inventive high built in device comprises a weight detection device determining the weight load of the bottom door (9).
