Abstract (en)

[origin: EP1462042A1] The package has a closed storage containing pumpable dietary liquid e.g. milk. A collecting unit collects a sub-set of suction and mixture of venture type and a sealing unit seals the package. A stack crossing bottom (7) and a lid, collects dietary liquid within the package by piercing or by removing lid. The sealing unit cooperates in an open manner with the suction and mixture sub-set in a passage of the collecting unit. An independent claim is also included for a method of production and distribution of a preparation in a hygienic manner.
