Abstract (en)
[origin: EP1462585A1] Storm clip comprises a wire section (4) having a hook (3) on its first end, and a sheet metal molded part (5) forming a C- or U-shaped part. The wire section is arranged with its second end so that it is able to slide longitudinally and is randomly fixed to the sheet metal molded part. The base of the sheet metal molded part has a perforation penetrated by the wire section. Preferred Features: The wire section protrudes with its second end over the base of the sheet metal molded part.
