Abstract (en)
A lottery game involves a group of individual main games each of which results in a win in dependence upon the number of matches between the symbols selected by a player and a randomly-selected set of symbols. In addition, there are bonus games which are won in dependence upon the correspondence between the bonus game sets of an individual player (each formed by symbols in corresponding positions within the sequences of his main game sets) and randomly-selected bonus game sets (each formed by symbols at corresponding positions within the different randomly-selected main game sets). <IMAGE>
