Abstract (en)

[origin: WO03057402A1] The invention relates to a crack inspection device which comprises at least one inspection unit (7) for inspecting parts (9, 10) for cracks using a suitable crack inspection method. Said inspection unit (7) can be displaced between at least two inspection positions (8a, 8b) by means of a travelling unit (3) and every inspection position (8a, 8b) can be supplied with one part to be inspected of the parts (9, 10).
