Abstract (en)  
[origin: EP1464551A1] To provide a driver airbag device with an airbag shape-maintaining component, wherein an inflator is readily mounted, an airbag device (71) is provided with a retainer (72), an airbag (73) mounted on this retainer (72) with an airbag-mounting ring (74), an inflator (76) to inflate this airbag (73), a shape-maintaining component (80) to maintain the shape of the folded airbag (73), a module cover (75) covering a folded-airbag unit, and the like. The shape-maintaining component (80) is fixed with bolts (85) and the like. The central portion of the shape-maintaining component (80) and the central portion of the front panel (73f) are seamed with a seam thread (80s). When an inflator (76) is mounted on an assembly of the folded-airbag unit and the retainer (72), since a space (S) is included in the inside of the folded-airbag unit, the front-end side of the inflator (76) is smoothly inserted. <IMAGE>
