Abstract (en)
[origin: EP1464580A1] The device for the strapping and/or bundling of pallets and objects has a strapping unit (1) with a guide unit (2) upon which is installed a sealing unit (3). The guide unit supports at least a part of the weight of the sealing unit. The guide unit has a linear guide (4) with the sealing unit installed on one end. The sealing unit is movable on the linear guide by means of an articulated element (7). A damping element is installed between the linear guide and articulated element for the defined orientation of the sealing unit.
