Abstract (en)

Thermal insulation element has a cover, stretched over a base plate, which is flexible and makes it possible to change the volume of the space between the cover and base plate by changing the gas pressure. Independent claims are also included for the following: (1) roof window, especially for a greenhouse or solar collector, fitted with this element; (2) use of a safety glass with an anti-reflection coating in a window element of a greenhouse; (3) use of a safety glass with a porous silica ( $\text{SiO}_2$ ) coating in a window element of a greenhouse; (4) use of a thermally pre-stressed safety glass with a porous  $\text{SiO}_2$  coating in a window element of a greenhouse, in which the coating is produced from a specified hybrid sol.

Abstract (de)

Ein Fensterelement (2), das für einen Einsatz in einem Gewächshaus (1) besonders geeignet ist. Dazu umfasst das Fensterelement (2) erfindungsgemäß ein mit einer Antireflex-Beschichtung versehenes Sicherheitsglas. <IMAGE>
