Abstract (en)
The method for the fitting of single or multi-ply membranes (2) on buildings entails the fitting of offset compensating profiles (5) to compensate for height and/or angle offsets between the parts of the building, the premounting of the membrane on a membrane mounting profile (6), the positioning of the membrane mounting profile on the offset compensating profile, the fitting of a channel sealing strip (18) in the membrane mounting profile, and the final fixing of the membrane mounting profile by the creating of a pressure force between the membrane mounting profile and offset compensating profile. An independent claim is included for a device for the fitting of single or multi-ply membranes on preferably stationary building parts using a two-piece fastening profile (4) which has an offset compensating profile and a membrane mounting profile which can be fastened to it and detached from it.

Abstract (de)
Die Erfindung betrifft ein Verfahren und eine Vorrichtung zur Montage ein- und mehrlagiger Membranen (2) an Gebäuden (3). Um einen teilweise unvermeidlichen Winkel- oder Höhenversatz zwischen den Bauteilen des Gebäudes (3) möglich zu machen, weist die erfindungsgemäße Vorrichtung (1) ein zweiteiliges Befestigungsprofil (4) auf, das ein Versatzausgleichsprofil (5) und ein an diesem befestigbares und demontierbares Membranhaltprofil (6) umfasst. <IMAGE>
