Abstract (en)
[origin: WO03056921A1] The invention relates to powder formulations, which consist of at least one agrochemical active ingredient, at least one biodegradable polyester containing hydroxyl groups, optionally blended with one or more additional biodegradable polymer(s), in addition to optional additives. Said formulations have a particle diameter of less than 125 μ m. The invention also relates to a method for producing the novel powder formulations and to the use thereof for applying agrochemical active ingredients to plants and/or their environment.
