Abstract (en)
[origin: WO03058783A1] The object of the invention is a structure of electrical distribution center, which includes a modular base construction (1) frame plates (2, 3) to be adjusted to it for mounting of a busbar system as well as profiles (4, 5, 6) to be adjusted to the base construction to which profiles plate and/or door coverings which cover the base construction are adjustable. The structure of electrical distribution center includes a middle frame plate (2) and additional frame modules (3) to be placed to one or to both sides of it, to which frame plates and/or additional frame modules the busbar system (11) is adjustable.
