Abstract (en)
[origin: EP1466702A1] The hammer drill (1), provided with a tool clamping device (2) and a switch (5) located at the handle (4) activating the connection between the power lead (6) and the drive unit (7), is additionally fitted with a sensor (8). The sensor (8) is positioned between the chucks (2) and the handle (4) in order to monitor the pressure applied on the tool (1) by the user and directed to the work-piece. After the working modus is selected by using a control switch (9) any negative influences are corrected automatically.
