Abstract (en)  
An anchor roller 20 for use on a boat to indicate the length of anchor cable paid out has a sheave 28 which will be mounted for example in a stemhead fitting 18. The sheave is arranged so that it rotates with the anchor cable as the cable is being paid out or pulled in. A counter mechanism counts the number of rotations of the sheave and has a readout 24 as part of the stemhead fitting itself. <IMAGE>
