Abstract (en)

[origin: EP1467141A2] The light has a housing (2) with at least one light source (7 1,7 2) and forming an essentially closed light radiation surface over its entire transparent surface. The light radiation surface is divided into at least two separate areas (10 1-10 4), each individually adjustable in respect of its brightness and /or color by influencing the light source or a light influencing element between the source and the housing.
