Abstract (en)

A dart board (10) includes a plurality of target blocks (50) engaged with spaces defined by ridges (30). Each target block (50) has a plurality of posts (51) extending therefrom. Each post (51) has at least one recess (511) defined in a periphery thereof. A dart hole (52) is defined in the target block (50) and located beside the posts (51). A receiving member (50A) is connected to an underside of the target block (50). The dart tip is guided by the posts (51) and successfully inserted into the dart hole (52). The dart tip is then firmly attached to the receiving member (50A).
