Abstract (en)

[origin: WO03055361A1] Provided is a health bedding beneficial to the human body. The health bedding comprises inner filling materials formed of stacked padding layers of talc-, magma stone- and chitosan - containing fibers, inner and outer sheaths wrapping the filling materials and a functional attachment made of jade, ceramic and magnet to the inner sheath. The health bedding of the invention comprises a plurality of layers which radiate a large amount of anions and far infrared rays and have antibacterial properties and a deodorizing function so as to promote metabolism of the human body, thereby serving especially beneficial functions to the human body.
