Abstract (en)  
[origin: WO03061690A1] Disclosed is a method of stimulating bone growth at a site in a subject in need of osteoinduction or cartilage repair. The method comprises the step of administering a therapeutically effective amount of an agonist of the non-proteolytically activated thrombin receptor to the site. Also disclosed is a method of stimulating the proliferation and expansion of chondrocytes in vitro. The method comprises culturing chondrocytes in the presence of a stimulating amount of an NPAR agonist.
