Abstract (en)

[origin: WO03058542A1] An ABP system (100) is implemented using a combination of both hardware and software. The ABP system (100) may include a database (101) or may interface one or more databases located on a single or multiple computer devices. A manufacturing network of an automaker that manufactures three basic models of cars. The network comprises of three manufacturing sites (102, 104 and 106) in turn comprises of multiple resources (110, 120 and 130). Each resource (110, 120, and 130) may be associated with one or more materials (140). Material (140) is any component part or component material or even finished goods that may be needed a resource to produce finished goods.
