Abstract (en)

[origin: WO03059646A2] The invention relates to a filling device for a writing instrument comprising a reservoir (6, 6a) which is arranged in a housing (1; 8, 7) and which receives a refillable liquid. A wick-type section of a writing tip (2) arranged freely on an end (7) of the housing (1) protrudes into said reservoir (6). A filling connection element (4) for the liquid can be mounted on the other end (8) of the housing (1), and a mobile dosing cap (5) is provided on said filling connection element (4), for freeing at least one filling opening (14, 14a, 11) for the supply of liquid before said dosing cap reaches its end position.
