Abstract (en)

[origin: US2004251264A1] The invention relates to a device for applying individual labels from a web of the same, said web taking the form of a strip or sleeve and said labels being applied to objects, preferably bottles. The device comprises a storage container for the labels that are to be applied. The storage container is configured as an interchangeable box, containing the labels in layers of loose accordion-folds. According to the invention, the uppermost layer of the web is drawn off for dispensing the labels and the undermost layer of the web is fed back at least up to the height of the uppermost layer and is freely accessible from the exterior of the box as an end piece.
