Abstract (en)

[origin: FR2835262A1] The device comprises: a two-for-one twisting spindle (1) supporting a wire winding (3) which is twisted or cabled by means of a second wire (4); means (6) for pulling the wire in order to cancel the tension resulting from the twisting or cabling operation; means (7) for heating the wire followed by a cooling area; means (11) for coiling the wire. Downstream from the heating means (7), said device comprises means (12) which are used to subject the wire to the action of at least one colorant (13).
