Abstract (en)
[origin: WO03060256A1] The invention concerns a flooring system comprising tiles (7), at least a series of identical and rigid slab framing modules (1, 8) in at least one plane, the framing modules of the series being complementary so as to be placed relative to one another for form an exposed grid of said slabs (7) and means for removably assembling together the modules, designed to impose a relative orientation of said modules and link them rigidly in one plane at least and to enable, once the flooring system is installed, to remove any one of the framing modules by manipulating only said framing module and, if required, only the adjacent slab(s) and or modules adjacent thereto.
