Abstract (en)

[origin: WO03063550A1] The invention relates to a control unit for a household appliance, preferably a cooking surface, comprising a control device and regulating devices interacting therewith in order to adjust different operating states of the device. A first regulating device thereof can be operated by means of a control element arranged at a distance from the control unit. The regulating devices comprise a second regulating device (33, 34, 35, 36) which is used to adjust the operating state which can be adjusted by the first control device (42) in a normal operation mode in an alternative operation mode of the control device (28, 29; 328, 329).
