Abstract (en)

[origin: EP1471207A1] The system has an anchoring unit (1) fixed to a support structure (4), and a sheet support unit (2) with a sheet reception unit (23) to receive a sheet (3). A bearing (11) in the unit (23) has an axial access passage to engage a shaft (21) axially in the bearing. The unit (23) and the sheet have a predetermined degree of inclination with respect to the support structure according to angular orientation of the shaft. An independent claim is also included for a weatherboard comprising a sheet fixation system.
