Abstract (en)

[origin: WO03065803A2] The invention concerns the use in an aqueous formulation, of a mixture comprising at least a solvent and at least a substance having antifoam properties in aqueous medium, the weight ratio solvent/antifoam substance ranging between 99.95/0.05 and 90/10; said solvent being selected among those for which all or part of the range of said weight ratio, the mixture is homogeneous and among those for which the aqueous formulation comprising 0.01 to 5 wt. % of mixture is homogeneous. The invention also concerns the aqueous formulations comprising said mixture.
