Abstract (en)
[origin: EP1333128A1] In order to improve the stability of a transport unit 2 comprising a plurality of panels 1 of insulating material, where said panels 1 are stacked on support means 3, wherein the transport unit 2 comprises at least one stack of a number of stacked panels 1, at least one panel 1 is provided with one or more partial slits 5, said panels 1 being retained together and protected by wrapping foil 4. By providing an insulating panel 1 with pre-cuts 6, 8, a transport unit may be provided with a good stability which improves both handling and transport of insulating panels between the producer of fibrous insulation material and the end users at the building sites. <IMAGE>
