Abstract (en)

[origin: WO03067009A1] The invention concerns a hinge arrangement for pivotable mounting of a movable sash on a fixed structure, such as the door of a vehicle, of a container or the like. Said arrangement comprises a member shaped like a hinge plate (6) mounted at its opposite ends, pivoting on the door and the fixed part, at least the part of the door or of the fixed structure, where to is articulated the hinge plate is formed by a profiled section integral with the door or the fixed structure. The arrangement is characterized in that the profiled section (10) is made of two separate components (48, 49), capable of being assembled by removable fixing means (59), one component (48) being integral with the door or the fixed structure (2) while the other component (49) forms the part to which is articulated the hinge plate (6). The invention is applicable to trucks.
