Abstract (en)  
[origin: WO03063476A1] The cabinet (1) for a display device (2) comprises a rear part (4) and a front part (5) mounted to the rear part (4). The display device (2) is mounted in the cabinet (1). The cabinet also comprises fastening elements for fastening the front part (5) to the rear part (4), the fastening elements comprising pairs (10a, 10b; 12a, 12b) of cooperating members of the front part (5) and the rear part (4). The pairs of members allow manual mounting of the front part (5) to the rear part (4). At least one resilient member (10a; 10b) is manually accessible, and has a shape and a position enabling it to be disengaged from its cooperating member (10b; 10a) by a manual displacement. After disengagement, the front part (5) and the rear part (4) are separable. The display apparatus has the display device (2) in the cabinet (1).
