Abstract (en)

[origin: DE10319676A1] The ski binding for fixing a ski boot (26) consisting of an upper and a sole, with a front holder (20) for the front end of the sole. A rear holder (28) grips the front sole or heel. Between the front and rear holders is a tension device. The front holder has at least one protuberance (32), preferably in the middle, which corresponds to a sole rim (27) protruding forward over the ski boot's upper, when the skier steps into the binding with a corresponding hole at the front sole end.
