Abstract (en)
[origin: EP1473372A1] The device (1) has a heat-insulated and vacuum-tight transport chamber (2) for heat transports. A transport device (3) is provided for cold transports and a common drive is provided for the transport chamber and the transport device. A carrying rack is located relative to a mobile carriage for the transport chamber and the transport device. Another carriage supports the rack for the transport device. An independent claim is also included for a system for heat treatment of metallic work pieces.
