Abstract (en)

[origin: EP1473521A1] The heat treatment device (1) has a water connection (2) for a flexible supply line (3) with a spray head (4) on the end. The water connection is fitted in the top region of the oven housing, and the length of the supply line is short enough to ensure that the spray head is kept clear of the region adjacent to the floor, where dirty water may have collected.
